

Ramkaran Heeralal & Sons Pvt. Ltd.
Revolutionizing Tradition: The Purest Besan, Crafted Without Heat.

A PIONEERING APPROACH TO PURITY

At **Ramkaran Heeralal and Sons Pvt. Ltd.**, we have redefined how Besan is made. We are proud to be the **First Plant of its kind** to research and implement a revolutionary process that prioritizes nutrient retention and taste above all else.

THE PROBLEM WITH CONVENTIONAL METHODS:

Traditionally, making Besan requires making Chana Dal first. This involves repeated heating and watering of the gram. This intense processing destroys vital nutrients, diminishes the natural aroma, and weakens the taste.

THE RH SPL DIFFERENCE: NO HEAT, PURE TASTE

We do not make dal. In our in-house mill, we take raw Chana straight from the farm and process it through automatic machines to clean and de-husk it, creating whole "Chana Gota" directly.

By bypassing the heating and watering stages entirely, we preserve the inherent nutritional value and the authentic, robust flavor of the grain. This results in Besan that is distinctly superior in taste to other famous brands.

THE GOLD STANDARD PROCESS

Our automated, hygienic process ensures zero compromise on quality.

WHY TECHNOLOGY MATTERS ?

We have moved beyond outdated methods to ensure consistency and safety.

TRADITIONAL STONE CHAKKI vs MODERN PIN MILLS

The Risk of Old Stone Mills (Chakki):

Traditional grinding carries the risk of fine stone grit contaminating the flour. Furthermore, achieving consistent quality across batches is nearly impossible.

The Superiority of Our Pin Mill System :

We utilize advanced Pin Mills that operate at low RPM to ensure cool grinding.

- **Pneumatic Cooling:** A specialized air system lifts the flour immediately after grinding, keeping it cool and preserving its quality.
- **Consistent & Safe:** The result is a perfectly uniform texture, free from contaminants, delivering the same high quality in every single pack.

B2B SOLUTIONS :

PREMIUM RAW MATERIAL SUPPLY

Not only do we produce the finest Besan, but our state-of-the-art facility also serves the industry.

WE SUPPLY SORTEX CLEAN CHANA GOTA

We provide high-quality, color-sorted Chana Gota (premium raw material) to other Besan manufacturing plants, ensuring they start their process with the best inputs available.
